Prof. Dr. Trueta
Wingfield Morris
Orthopaedic Hospital
Headington Hill, Headington
Oxon

Dear Professor Trueta, -

let me start by thanking you again for the kind interest you are taking in my case. Un

Under separate covers I am sending you all my roentgenograms starting with 1958. There are very many of them, I am afraid, but I thought you might possibly wish to look at them as at a film, seeing the whole story unfold, so to speak.

Enclosed please find

1. A fairly complete report composed by Prof. Labhart. Unfortunately, the report was written in German, and as I am quite uncertain of most of the medical terms involved, I had to have it translated. Also unfortunately, I don't deem the translation very good. May it suffice to serve its purpose. In case you happen to read German I am sending Prof. Labhart's German report as well.
2. In January of this year a partial check up of a general nature was made by Dr. Essellier. "In dubio pro reo", and in dubio I am sending things which may be unnecessary rather than withholding stuff that might prove to be of interest.
3. This applies even more to the rest of my small enclosures. During the period from 1958 till now I have been intermittently under the care of the Viennese Dr. Ackermann. Having studied - in particular - the roentgenograms of Dec. 4th 1963 and Feb. 13th 1964, Dr. Ackermann has jotted down some sketches and annotations. The latter being written in German, it is all the more likely that you will have no use for them. Well, - at any rate there they are and you will surely throw them away if you don't care for them.

Above all it is your own diagnosis based on the X-rays as well as the case history which counts and will be decisive for me.

I shall take the liberty of calling you on Friday next, March 13th shortly before noon. As I'll make it a personal call, I do hope to get you on the line sometime that day.

With warmest regards

yours very sincerely

JPI/SESN
